The natural alternative – wood slats for systems SG 8910 and 8960. Additionally, some 50mm aluminium slats are available. The table above illustrates the various components that have been pre-selected to offer the best colour co-ordinated blind. The decorative tape is optional and an alternative colour from our range can be selected.

- **Ladder cord** – the cord which the blind slats sit in
- **Lift tape/cord** – the cord running through the centre of the slats at numerous points which lifts the blind
- **Operating cord** – the cord which is pulled to operate the blind
- **Tape colour** – optional decorative tape for a softer appearance

Grey 514	Black	Dark Brown	Brown	Deep Brown	Nickel

The chart above details the standard colours supplied unless otherwise ordered.

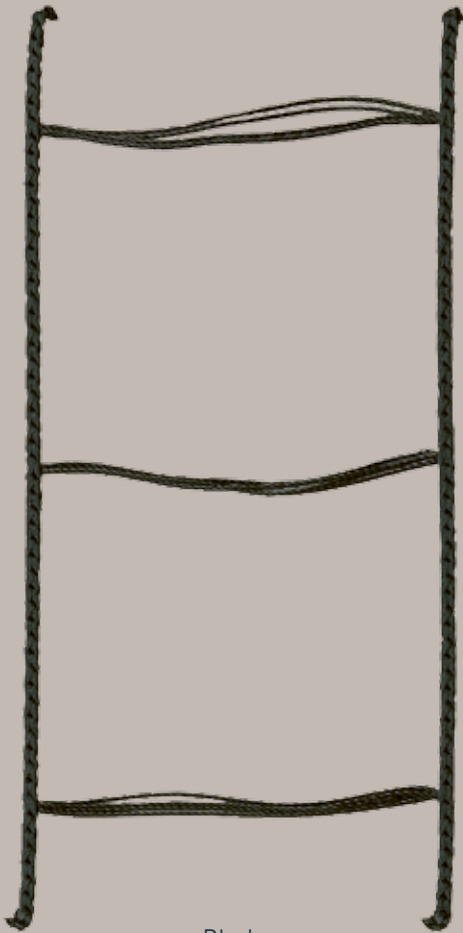

Venetian blinds systems SG 8910 and 8960 are available with leather covered slats. The various components of these blinds are colour co-ordinated to the best match we feel possible. However, we accept that in some cases an alternative from our suggested standard is preferred. For this reason we are able to offer customer choice on the colour of:

- **Ladder cord** – the cord which the blind slats sit in
- **Lift tape/cord** – the cord running through the centre of the slats at numerous points which lifts the blind

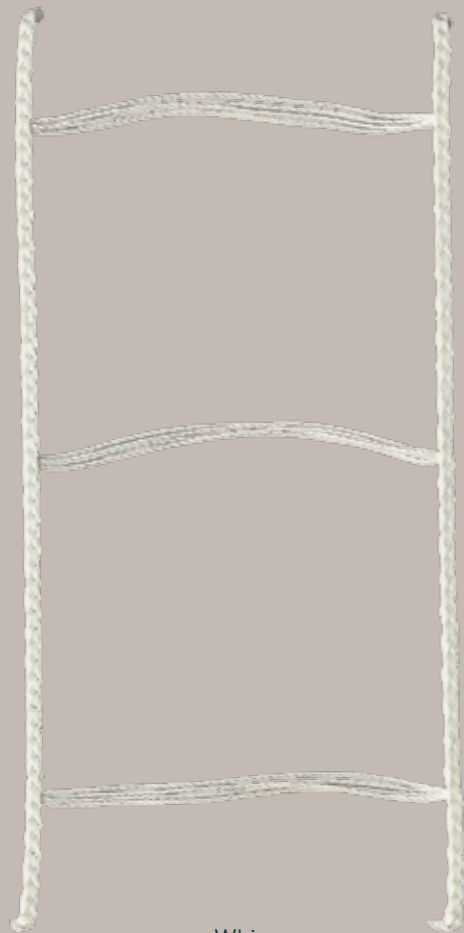

- **Operating cord** – the cord which is pulled to operate the blind
- **Eyelets** – the metal surrounding the aperture where the lift tape or cord pass through the slat
- **Stitching** – the seam sewing the leather to the slat

The **headrail** and plastic parts are supplied as standard painted, colour matched to the colour of the leather. Alternatively, the headrail can be covered in the same leather as the slat at an additional cost. Please refer to the Silent Gliss price list.
